

### Angled to perfection

Designed by LampsLite, U32-1 introduces an all-new line of lights. Constructed entirely from metal, it explores the concept of modern lighting, taking heavily from contemporary trends, particularly the tension and structure of the modern city. Composed from two icosahedric geometries, it presents a distinct angular dialogue, between surface and frame.

### Light up your room

The Knitted Lamp by Meike Harde mimics the design body of a stereotypical lamp. And that is where the comparison ends. Created by stretching the material on an acrylic frame, the tension created gives the light its delicate appearance. For a strong outline, the mesh is fixed underneath the lampshade and pedestal. The stretchable material keeps its homogeneous surface all the time. Compared to common textiles it does not provoke any wrinkles. Instead the knitted structure becomes more light or close-meshed by changing the diameter.

### Hello outdoors

Looking to brighten up your outdoor spaces? Italian brand Paola Lenti's Bistrò and Clique could be the answer to that. Bistrò is a parasol made of fabric available in a flat or dome-shaped sunshade that is designed to be used together and also to allow for creation of large sheltered areas. The Clique side tables and seating are accessories, which complete and personalise Bistrò, thereby creating little reserved convivial areas for resting, eating, reading or talking. ### Polished curves

Manufactured by Cassina and designed by Jean Marie Massaud, the Aspen sofa effectively redefines curves with its design. Available in widths of 180 cm and 260 cm, a horizontal twist at the backrest allows one to move the sofa left or right. Upholstery can be customised in removable fabric or leather.
