FOGLIZZO PAOLA LENTI PLH

FOGLIZZO

Since 1921, Foglizzo's reputation has been founded on the design and development of high quality leathers for clients who require exclusivity and individual customisation. Heir of the best Italian tradition, over three generations, Foglizzo is driven by the culture of excellence with unparalleled artisanal know-how, innovative technical skills and the unique ability to understand the customer's needs. Leveraging its experience in crafting leather for the restorations of antique cars, today the Company supplies exclusive high quality leather to the yachting, aviation, motor and residential interior design industries.

Foglizzo's mission is to develop high customised leather for clients that appreciate its authentic characteristics and unique qualities.

Recently Foglizzo introduced the Atelier, an artisanal laboratory with the aim to find new creative expressions of leather, where art, innovation technologies and traditional craftsmanship work together.

A collection of luxury leather accessories with timeless appeal, fully customisable, ultimate expression of our savoir-faire.

PAOLA LENTI

During the Milan Design Week, Paola Lenti presented its new collections, that see chords as the theme of this edition, revealing tracks, intangible counter-points, passages towards flexible spaces, domestic topographies where Paola Lenti creations hold the balance between energy and grace, precision and style, by virtue of a phrasing made of soft modulations always pursuing beauty and usefulness.

Imagination and accuracy as aesthetic method: it is the story of different levels of reality, a new composition of plots, intersections, variations and overlaps in a constant search for beauty, which dwells only in interplay, essential to combine imagination with life. New perspectives induce unprecedented relation schemas; unexpected living models offer a visible synthesis of form and function: the objects of furnishings speak the exclusive language of art, in a shared horizon that cancels every boundary between the enclosed and the open, between the inside and the outside. The simplicity of the forms and their chromatic hues become narrative material, metaphorical language.

The artistic energy that ascends from the furniture by Paola Lenti - capable of melting substance and vision - remarkably reveals the very essence of reality and returns it to the world. This year Paola Lenti introduced new outdoor rugs marking a new milestone in the evolution of the High Tech collection: from the multicolor version of the Kimia fabric Nilo comes to life, a mat with bright colours and geometric patterns, which can be combined with several outdoor seating.

PLH, active in many research fields and on a perpetual quest to discover new forms, materials and technologies concerning switching devices, combines Italian craftsmanship, research and design.

At the Milan Design Week PLH unveiled its latest collection of control devices entitled "MakeUp Wood collection", created in collaboration with Haute Material, an Italian wood specialist firm focusing on the combination of wood and design. The collection is a tribute to nature we can feel with all our senses through the fibers of the most valuable wood. The particularities of the different types of wood are enhanced by various treatments. The switches are chiseled from a solid piece of wood through delicate processes, and can be decorated with inlaid by hand with different metals or laser cut patterns. PLH made a selection of exclusive wood types from Haute Material, such as: Swiss Pine, Heat-treated Oak, Black Walnut.

"MakeUp Wood" is just the ultimate evolution of PLH, which has been successfully developing since 2006 a wide range of collections with sophisticated and primitive shapes, allowing unlimited possibilities of customization.
