Details of enameled copper surfaces

Quando si sfoglia un atlante, lo sguardo viaggia attraverso il mondo secondo il racconto che ne fanno le carte geografiche.

Per estensione, chiamiamo atlante una raccolta di immagini organizzata per introdurre alla conoscenza di fenomeni, oggetti, esseri viventi e molto altro.

Questo catalogo è pensato come una sorta di atlante. Una raccolta di immagini che illustrano spazi abitativi: stanze, ovvero microcosmi accoglienti e, di volta in volta, differenti.

Dunque, una collezione di interni, più che una collezione per interni.

When you leaf through an atlas, your gaze travels around the world, following a story told by maps.

By extension, we also use the term atlas to describe any collection of pictures arranged in such a way as to familiarize us with a given set of phenomena, or objects, or living creatures – and the list could go on.

This catalogue is conceived as a kind of atlas. An assembly of pictures that illustrate living spaces: rooms, which are welcoming, comfortable microcosms, that vary and differ from one instance to the next. This atlas, then, is a collection of interiors, much more than it is a collection for interiors.

Per costruire una visione dell'architettura
e dello spazio è necessario viaggiare, spostarsi
nel mondo e con il pensiero.

I nostri processi creativi e produttivi sono
fortemente legati a luoghi, vicini e lontani:
alle loro culture e tradizioni, ai loro artigianati,
materiali, saperi. Da questi incontri, a volte casuali,
a volte frutto di ricerche, si sono sviluppate
relazioni, collaborazioni.

Ci piacerebbe che queste esperienze si legges-
sero negli oggetti e nelle stanze di queste pagine
e costituissero la loro intima ricchezza.

If we wish to build a vision of space and
architecture, it becomes necessary to travel,
move through the world, travel with our thoughts.

The processes by which we create and produce
are powerfully bound up with places, both near
and far: those places' cultures and traditions,
their artisanry, their materials, their bodies of
knowledge. And it is out of these encounters that
relationships and collaborations have developed.
We hope that these experiences can be read
in the objects and rooms mapped on these pages;
we aspire to make those experiences the source
of their innermost richness.

Queste immagini ritraggono ambienti molto diversi fra loro.

Sono stati pensati per orientare chi è in cerca di suggestioni e per suggerire modi di intendere lo spazio: cosa può accadere accostando diverse tonalità, in che modo possono coesistere oggetti e materiali differenti, quali texture sanno parlarsi, come una stanza può risuonare di un ritmo proprio grazie a una partitura architettonica attentamente orchestrata, in cui il colore fa da trait d'union fra elementi diversi.

These images depict settings that differ widely. They were chosen and shaped to guide those who are in search of ideas as well as to offer ways of thinking about and understanding space: what can happen when you juxtapose different tones and shades, how different objects and materials can coexist, which textures can carry on a conversation, and how a room can resonate to a rhythm all its own thanks to a thoughtfully orchestrated architectural score, where color serves as the through-line linking various elements.

Alcuni set sono stati ospitati in dimore che sono specchio di storie, latitudini e contesti diversi. Sono esempi di spazi domestici risultato dello stratificarsi di scelte e gesti quotidiani, capaci di parlare la lingua di chi li abita e li ha vissuti. In questi ambienti, caratterizzati da equilibri formali e cromatici ogni volta differenti, le nostre soluzioni abitative hanno trovato una scena ideale e si sono integrate grazie alle relazioni reciproche tra gli oggetti, come in un vero e proprio ecosistema.

Certain of the sets were created in homes that are reflective of a broad array of histories, latitudes, and contexts. These are examples of domestic spaces created through the stratification over time of everyday choices and actions, speaking the language of the people who live there now and those who spent their lives there in the past. In these settings, characterized by balances of form and color, our residential solutions have found an ideal stage, integrated thanks to the reciprocal relationships between objects, as in a fullfledged ecosystem.

Uno spazio privato va rispettato.

Chi vi entra, dovrebbe sostare sulla soglia
con attenzione per percepirla l'atmosfera,
la specificità.

Gli oggetti che progettiamo devono avere questa
qualità di discrezione, saper incontrare affinità
di gusto, creare corrispondenze, portare, senza
invadenza, accenti nuovi.

Dare l'impressione di esserci sempre stati,
stringere amicizie e condividere idee.

A private space demands respect. Anyone who
enters that space ought to linger at the front door,
breathing in the atmosphere and its specific and
distinctive elements. The objects that we design
must possess this quality of discretion, be capable
of encountering affinities of taste, create corre-
spondences, and introduce new accents, without
being intrusive. They must give the impression of
having always been there. They should, as it were,
make friendships and share ideas.

Colori e materiali sono alla base del percorso che, in origine, si è sviluppato intorno ai tappeti. I tappeti, tradizionalmente, sono oggetti ibridi che possono abitare sia l'interno sia l'esterno della casa. La superficie del tappeto porta nella casa la bellezza di un altrove naturale. In luoghi aperti, invece, il perimetro del tappeto suggerisce che per uno spazio di intimità è sufficiente un confine leggero, simbolico. Questo confine fluido fra dentro e fuori, interno ed esterno, connota ciò che facciamo e indica che il luogo che abitiamo è parte di un ordine più ampio.

Colors and materials are at the foundation of the process that originally developed around carpets. Carpets have traditionally been hybrid objects that can inhabit both the interior and the exterior of the house. The carpet's surface brings into the home the beauty of a natural elsewhere. In open spaces, however, the perimeter of the rug suggests that for a space of intimacy, all we need is a light and symbolic boundary. This fluid boundary between the interior and exterior provides a connotation to what we do and indicates that the place we inhabit forms part of a broader order.

In questa collezione di interni trovano posto famiglie di tavoli, tavolini, pouf, sedie, poltrone, poltroncine, paraventi, pareti mobili, tappeti, stuoie, cuscini, divani, chaise longue, contenitori, mensole librerie, boiserie, pannelli. Ognuno di questi oggetti è il risultato di una attitudine che contraddistingue un modo di progettare e produrre: un'idea di spazio umano come parte di un contesto ambientale e culturale più vasto.

Questo pensiero si esprime in prodotti che coniugano concretezza e bellezza. Le loro qualità estetiche sono il frutto di ricerche condotte su materiali, colori, tecniche tradizionali e tecnologie, oggi sempre più orientate alla sostenibilità.

In this collection of interiors, there is room for families of tables, side tables, ottomans, chairs, armchairs, screens, movable walls, rugs, cushions, sofas, chaise longues, cabinets, bookshelves, boiseries, and panels. Each of these objects is the product of an aptitude that distinguishes a special way of designing and manufacturing: an idea of human space as part of broader environmental and cultural context. This body of thought expresses itself in products that unite concrete form and beauty. Their aesthetic qualities are the product of research conducted on materials, colors, traditional techniques and technologies, these days increasingly focusing on sustainability.

La sostenibilità è un valore centrale che indirizza ricerche e soluzioni.

Nel corso del tempo l'attenzione all'ambiente e alla salute delle persone ha fatto sì che si selezionassero materiali e processi produttivi a minor impatto ambientale. L'obiettivo non è solo ottenere le certificazioni che indicano il rispetto di parametri ambientali ed etici, riferiti al ciclo di vita del prodotto, al sito ed alla struttura aziendale. Ma soprattutto di assumere come responsabilità una visione globale che promuova la riciclabilità e la longevità dei materiali. Produrre oggetti destinati a rimanere nel tempo e che diano le migliori prestazioni possibili nel rispetto del Pianeta è una scelta oggi irrinunciabile.

Sustainability is a central value that guides the research we do and the solutions we implement.

Over the course of time, the focus on the environment and the health of individuals has encouraged us to opt for the materials and manufacturing processes that entail the lightest environmental footprint. The objective has been not only to obtain certifications attesting to our respect for environmental and ethical parameters. It has primarily meant taking on as a responsibility a global vision that entails encouraging the recyclability and longevity of the materials used. Producing objects that are bound to endure over time and offer the finest possible performance compatible with respect for the planet is an obligatory choice for us today.

I rivestimenti tessili, sintetici e naturali, come lana, feltro, cotone, lino, canapa, contrassegnano la nostra storia.

Molti anni fa, siamo partiti da un filo studiato per creare tessuti e rivestimenti innovativi per estetica e performance. Nel tempo, a questo se ne sono aggiunti molti altri, messi a punto per realizzare progetti e oggetti, e dotati di caratteristiche nuove su cui costruire e a cui ispirarsi.

Alla base di queste ricerche c'è sempre la volontà di assecondare l'intima natura delle cose, senza forzature, e la convinzione che l'estetica delle superfici sia strettamente connessa con le peculiarità dei materiali di cui sono fatte.

Fabric upholsteries, whether synthetic or natural, such as wool, felt, cotton, linen, and hemp have been a persistent feature of our history.

Many years ago, we started out with a thread designed to create textiles with innovative aesthetics and performance. Over time, many other yarns joined that first one, developed for the production of designs and objects, and endowed with new features upon which to build and base our inspiration. At the foundation of this research, there's always the determination to comply with the intrinsic nature of things, without forcing the issue, as well as the conviction that aesthetics of the surfaces is closely connected with the distinctive qualities of materials they're made of.

Nel tempo, alle fibre tessili si sono aggiunti vetri, metalli, legni, pietre, ceramiche.

Le loro intrinseche caratteristiche osservate e indagate, hanno rivelato possibilità inespresse, usi ed effetti da cui si sono sviluppati nuovi percorsi.

Il modo in cui si lavorano e si producono – intarsi, fusioni, mescolanze, colorazioni – è il risultato di sperimentazioni e tecnologie finalizzate a valorizzarne l'essenza. Grazie a questo modo di procedere, la decorazione non è mai fine a se stessa: texture e cromatismi sono la naturale conseguenza del linguaggio della materia. Il nostro compito è riconoscerlo e lasciarlo parlare.

Over time, the textile fibers have been joined by glass, metal, wood, stone, and ceramics.

Their intrinsic characteristics have revealed unexpressed possibilities, uses and effects from which new paths have developed. The way in which they have been processed and manufactured – inlays, fusions, mixtures, and colorings – is the result of experimentations and technologies designed to make the most of their essence. Thanks to this approach, the decoration is never an end in itself: textures and colorings are the natural consequence of the language of materials. Our job is to recognize that fact and allow it to speak.

Foliage finish RTM498 | TWEED rug TWD003

Le immagini che illustrano Stanze raccontano
uno sguardo su modi di pensare e vivere lo spazio,
di allestire quei microcosmi domestici
che chiamiamo casa.

Ma anche di intendere gli oggetti, il loro aspetto
e la loro anima che poi è la storia di cui sono
fatti, la materia, i processi, i gesti grazie ai quali
sono venuti alla luce, e di cui la superficie
è il risultato visibile.

Anche in questo caso, per noi, interno ed esterno,
la forma e il contenuto, sono parti di un insieme
che vive in armonia e coerenza.

The pictures that illustrate Stanze (Rooms) tell
the story of a gaze into ways of conceiving and
living in space, of creating those domestic micro-
cosms that we call home.

But they also have much to say about how we un-
derstand objects, their appearance, and their soul,
which is after all the history of which they are made,
the material, the processes, the gestures and
actions by means of which they have come into
existence, and of which the surfaces is the visible
result. In this case as well, for us, the interior and
the exterior, the shape and the content, are all parts
of a whole that exists in harmony and consistency.

SILENT bed, headboard woven with Chain Outdoor CPE203-32-203B, bedframe in Piqué PQA2D16 | SMILE armchair in Piqué PQBF8 | FRAME bench in Rope TRD647
PASSEPARTOUT side tables, wooden top LML336 | LOTO modular screen woven with Rope cord 9114, steel frame LML342 | ZOE rug in Rope cord T203-14
