HONORING THE HOLLYWOOD HILLS

The residence honors the Hollywood Hills by incorporating the inspiration of its surroundings.

Coined as the Franklin Residence, the project was designed by Los Angeles based Tag Front for every room to overlook the entire skyline, from downtown's high-rises to the Santa Monica beach.

As a result, the Franklin Residence effectively allows one to coexist with the city through its vast, open glass façades that open onto the City of Angels' nightlights and coastlines.

The pool patio with furniture by Francesca Rota and Paola Lenti. Patricia Urquiola designed the lounge seats for Kettal. Each design attributes its originality to the selection and creation of the material, and the simplicity of its form.
